# Our Brief

At PT Andalas Global Perkasa, we specialize in exporting Indonesia's finest natural commodities – with a strong focus on Cinnamon, Areca Nut, and Clove sourced from the fertile heartlands of Sumatra.

To be a leading and trusted global exporter of Indonesian spices and agricultural products, known for quality, integrity, and innovation.

**Cinnamon, Areca Nut, and Clove** – sourced directly from the fertile heartlands of Sumatra, renowned for producing the world's best spices.

# About Us

PT Andalas Global Perkasa is a leading spice exporter based in West Sumatera, Indonesia. Our journey began with a simple mission: to bring the authentic flavor and natural wealth of Indonesian spices to international markets through ethical and sustainable practices. We work hand-in-hand with local farmers, ensuring fair trade, consistent quality, and long-term collaboration. Every shipment reflects our values – integrity, excellence, and respect for nature. At PT Andalas Global Perkasa, we bring the finest treasures of Indonesia to the global market.

## Vision

To become a trusted global exporter of Indonesian spices and agricultural products, recognized for quality, integrity, and innovation.

## Mission

- Empowering local farmers through sustainable partnerships.
- Delivering premium products that meet international standards.
- Building a transparent, efficient, and eco-friendly supply chain.

## Cassia AA Stick Cut Estonia

Style	Stick Cut Estonia
Size	Larger Diameter
Dimension	6cm ; 3.5" ; 4.0" ; 6.0"
Weight	25–50 kg
Packaging	PP/PE Bags

# Cassia Broken

## Cassia A Broken

Cassia Broken A is the premium grade, consisting of larger, thicker pieces of cinnamon bark with a bright reddish-brown color and high essential oil content. Clean and pure, it is highly suitable for producing premium cinnamon powder and high-quality essential oil.

## Cassia B Broken

Cassia Broken B is the medium grade, with moderately sized pieces and a slightly darker tone compared to Grade A. It still carries a good level of essential oil and is commonly used for industrial cinnamon powder production, instant beverages, bakeries, and general food.

## Cassia C Broken

Cassia Broken C is the economical grade, composed of smaller, mixed pieces with more varied colors and lower oil content. While more affordable, it remains a valuable option for large-scale cinnamon powder production, blended seasonings, and industrial extraction.

# Cloves

## Specification

Variety	Zanzibar / Ambon
Origin	West Sumatra, Indonesia
Moisture Content	Max 11%
Bud Size	8–12 mm
Color	Natural dark brown
